

# Item / Item Warehouse sync from SyteLine to SFDC

Create an **Item** in SyteLine, as a result, **Item Warehouse** gets automatically created with the **Quantity On Hand value as 0 (Zero)**

Item and Item Warehouse get created in HubKor and posted to SFDC

Product and Product Inventory with the Quantity On Hand value as 0 get created in SFDC. External IDs are populated in the above records, confirming that Product and Product Inventory are synced in SFDC

Update an Item and, to increase the Quantity On Hand value, create a **Miscellaneous report** in SyteLine

Item and Item Warehouse get updated in HubKor and posted to SFDC

Product and Product Inventory's Quantity On Hand value gets updated in SFDC

Delete an Item from SyteLine, and Item Warehouse gets deleted automatically

Item and Item Warehouse are deleted in HubKor and posted to SFDC

Item does not delete in SFDC; instead, its status is updated to "Obsolete"
